

Author Index for Volume 16

- | | | |
|---|--|------------------------|
| Bouniol, S., 115 | Jones, A., 595 | Tettero, O. et al, 145 |
| Boyce, B., 25 | | |
| Bunnell, J. et al, 629 | Kemp, A., 663 | Volpano, D. et al, 137 |
| | Kovacich, G., 14, 321, 455,
610, 657 | |
| Ciechanowicz, Z., 223 | Krsul, I. et al, 233 | Wang, C. et al, 339 |
| Clarke, A., 669 | | |
| Cohen, F., 29, 94 | Labuschagne, L. et al, 543 | |
| Cresson Wood, C., 316 | | |
| | Molini, J., 189 | |
| Finne, T., 197, 469 | Mulhall, T., 277, 285, 291,
298, 304, 307 | |
| Foley, S., 551 | | |
| | Parker, D., 572 | |
| Gennaro, R. et al, 481 | Pounder, C., 590 | |
| Gritzalis, D., 709 | | |
| | Ratnasingham, P., 650 | |
| Hickson, N., 583 | | |
| Highland, H.J., 365, 369, 387,
412, 416, 430,
439 | Sherwood, J., 603 | |
| Hinke, T. H. et al, 687 | Soh, B.C. et al, 71 | |

Subject Index for Volume 16

Access control

- a management view of Internet electronic commerce security 316
- building Chinese walls in standard Unix 551
- improved system-access control using complementary technologies 543

Administration

- managing security for outsourcing contracts 603

Attacks

- information system attacks: a preliminary classification scheme 29

Audit. See System audit

Authentication

- improved system-access control using complementary technologies 543
- modified Chen-Hwang identity-based conference key broadcast schemes with user authentication 339

Authorship

- identifying the author of a program 233

Biometrics

- what are the information security risks in decision support systems and data warehousing? 197

Careers

- how to market yourself as an ISSO 657
- ISSO career development 455

Certification

- encryption policy - a UK perspective 583
- ISSO career development 455
- secure flow typing 137

Chinese wall

- building Chinese walls in standard Unix 551

Ciphers. See Encryption

Clark-Wilson integrity model

- building Chinese walls in standard Unix 551

Classification

- information system attacks: a preliminary classification scheme 29
- information system defences: a preliminary classification scheme 94

Cognitive passwords

- cognitive, associative and conventional passwords: recall and guessing rates 629

Complementary technologies

- improved system-access control using complementary technologies 543

Computers

- historical bits and bytes 387
- see also Hacking; Software; Viruses

Confidentiality

- the strategic values of information security in business 572

Contracts

- managing security for outsourcing contracts 603

Control

- EDI security - re-evaluation of controls and its implications on the organizations 650

Copyright

- where have all the hackers gone? Part 4 298

Countermeasures

- risk analysis: requirements, conflicts and problems 223

Crime

- cyber extortion - the corporate response 25
- the strategic values of information security in business 572

Subject Index

- where have all the hackers gone? Part 1 277
- where have all the hackers gone? Part 4 298
- Cryptography. *See* Encryption
- Data protection
 - where have all the hackers gone? Part 4 298
- Data warehousing
 - what are the information security risks in decision support systems and data warehousing? 197
- Databases
 - protecting databases from inference attacks 687
- Decision support systems (DSSs)
 - what are the information security risks in decision support systems and data warehousing? 197
- Defence methods
 - information system defences: a preliminary classification scheme 94
- Design model
 - information security embedded in the design of telematics systems 145
- Documentation
 - managing security for outsourcing contracts 603
 - DTI encryption policy - a UK perspective 583
- Economics
 - information warfare and the information systems security professional 14
- Electronic borders
 - electronic borders: defining and protecting national networks 189
- Electronic communications
 - first steps towards a European Union policy on the securing of electronic communications 590
- Electronic data interchange (EDI)
 - EDI security - re-evaluation of controls and its implications on the organizations 650
- E-mail
 - the threats on the Web 365
 - what are the information security risks in decision support systems and data warehousing? 197
- Embedded systems
 - embedded systems: the other problem 663
- Encryption
 - cyber extortion - the corporate response 25
 - data encryption: a non-mathematical approach 369
 - encryption policy - a UK perspective 583
 - first steps towards a European Union policy on the securing of electronic communications 590
 - key recovery - why, how, who? 669
 - the strategic values of information security in business 572
 - two-phase cryptographic key recovery system 481
- Espionage
 - information warfare and the information systems security professional 14
- European Union
 - first steps towards a European Union policy on the securing of electronic communications 590
- Fire
 - what are the information security risks in decision support systems and data warehousing? 197
- Flood
 - what are the information security risks in decision support systems and data warehousing? 197
- Guessing rate
 - cognitive, associative and conventional passwords: recall and guessing rates 629
- Hacking
 - what are the information security risks in decision support systems and data warehousing? 197
 - where have all the hackers gone? Part 1 277
 - where have all the hackers gone? Part 2 285
 - where have all the hackers gone? Part 3 291
 - where have all the hackers gone? Part 4 298
 - where have all the hackers gone? Part 5 304
 - where have all the hackers gone? Part 6 307
- Healthcare Information Systems
 - a baseline security policy for distributed healthcare information systems 709
- High energy radio frequencies (HERF)
 - cyber extortion - the corporate response 25
- History
 - a history of computer viruses: three special viruses 430

- a history of computer viruses - introduction 412
- a history of computer viruses - the famous 'trio' 416
- historical bits and bytes 387
- Identification
 - improved system-access control using complementary technologies 543
- Identity-based scheme
 - modified Chen-Hwang identity-based conference key broadcast schemes with user authentication 339
- Impact analysis
 - risk analysis: requirements, conflicts and problems 223
- Industrial espionage
 - information warfare and the information systems security professional 14
- Inference detection
 - protecting databases from inference attacks 687
- Information systems
 - encryption policy - a UK perspective 583
 - how to market yourself as an ISSO 657
 - information security implemented in: the theory on stock market efficiency, Markowitz's portfolio theory and Porter's value chain 469
 - information system attacks: a preliminary classification scheme 29
 - information system defences: a preliminary classification scheme 94
 - information systems security metrics management 610
 - information warfare and the information systems security professional 14
 - ISSO career development 455
 - the ISSO must understand the business and management environment 321
 - the strategic values of information security in business 572
 - what are the information security risks in decision support systems and data warehousing? 197
- Information technology
 - penetration testing and system audit - experience gained during the investigation of systems within the UK 595
- Information warfare
 - information warfare and the information systems security professional 14
- Internet
 - a management view of Internet electronic commerce security 316
 - electronic borders: defining and protecting national networks 189
 - historical bits and bytes 387
 - ISSO career development 455
- Intrusion
 - penetration testing and system audit - experience gained during the investigation of systems within the UK 595
 - system intrusion processes: a simulation model 71
- Key distribution
 - modified Chen-Hwang identity-based conference key broadcast schemes with user authentication 339
 - the puzzle theorem - the less I know, the less I can disclose... 115
- Key escrow
 - key recovery - why, how, who? 669
 - two-phase cryptographic key recovery system 481
- Key management
 - encryption policy - a UK perspective 583
- Key recovery
 - key recovery - why, how, who? 669
 - two-phase cryptographic key recovery system 481
- Knowledge management
 - the strategic values of information security in business 572
- Legislation
 - embedded systems: the other problem 663
 - encryption policy - a UK perspective 583
 - the strategic values of information security in business 572
 - where have all the hackers gone? Part 4 298
- Management
 - a management view of internet electronic commerce security 316
 - information systems security metrics management 610

Subject Index

- managing security for outsourcing contracts 603
- penetration testing and system audit - experience gained during the investigation of systems within the UK 595
- the ISSO must understand the business and management environment 321
- Marketing
 - how to market yourself as an ISSO 657
 - Markowitz's stock portfolio theory information security implemented in: the theory on stock market efficiency, Markowitz's portfolio theory and Porter's value chain 469
- Metrics
 - information systems security metrics management 610
- Military technology
 - information warfare and the information systems security professional 14
- Mobile communication
 - what are the information security risks in decision support systems and data warehousing? 197
- Model validation
 - system intrusion processes: a simulation model 71
- Networks
 - electronic borders: defining and protecting national networks 189
 - historical bits and bytes 387
 - ISSO career development 455
- Outsourcing
 - managing security for outsourcing contracts 603
- Passwords
 - cognitive, associative and conventional passwords: recall and guessing rates 629
- Police
 - where have all the hackers gone? Part 6 307
 - Porter's value chain information security implemented in: the theory on stock market efficiency, Markowitz's portfolio theory and Porter's value chain 469
- Power supplies
 - what are the information security risks in decision support systems and data warehousing? 197
- Privacy
 - encryption policy - a UK perspective 583
- Problem-solving
 - information security embedded in the design of telematics systems 145
- Protection
 - building Chinese walls in standard Unix 551
 - electronic borders: defining and protecting national networks 189
 - information system defences: a preliminary classification scheme 94
- Protocols
 - the puzzle theorem - the less I know, the less I can disclose... 115
- Public key systems
 - two-phase cryptographic key recovery system 481
- Puzzle theorem
 - the puzzle theorem - the less I know, the less I can disclose... 115
- Re-authentication
 - improved system-access control using complementary technologies 543
- Recall rate
 - cognitive, associative and conventional passwords: recall and guessing rates 629
- Records
 - embedded systems: the other problem 663
- Requirements
 - information security embedded in the design of telematics systems 145
- Risk management
 - a management view of internet electronic commerce security 316
 - cyber extortion - the corporate response 25
 - EDI security - re-evaluation of controls and its implications on the organizations 650
 - risk analysis: requirements, conflicts and problems 223
 - what are the information security risks in decision support systems and data warehousing? 197
- Security
 - a baseline security policy for distributed healthcare information systems 709

- a management view of Internet electronic commerce security 316
- building Chinese walls in standard Unix 551
- EDI security - re-evaluation of controls and its implications on the organizations 650
- embedded systems: the other problem 663
- encryption policy - a UK perspective 583
- first steps towards a European Union policy on the securing of electronic communications 590
- historical bits and bytes 387
- how to market yourself as an ISSO 657
- information security implemented in: the theory on stock market efficiency, Markowitz's portfolio theory and Porter's value chain 469
- information systems security metrics management 610
- information warfare and the information systems security professional 14
- ISSO career development 455
- managing security for outsourcing contracts 603
- penetration testing and system audit - experience gained during the investigation of systems within the UK 595
- procedures to reduce the computer virus threat 439
- protecting databases from inference attacks 687
- secure flow typing 137
- the ISSO must understand the business and management environment 321
- the puzzle theorem - the less I know, the less I can disclose... 115
- the strategic values of information security in business 572
- two-phase cryptographic key recovery system 481
- what are the information security risks in decision support systems and data warehousing? 197
- Simulation
 - system intrusion processes: a simulation model 71
- Software
 - identifying the author of a program 233
 - procedures to reduce the computer virus threat 439
 - what are the information security risks in decision support systems and data warehousing? 197
 - see also Viruses
- Statistics
 - historical bits and bytes 387
- Stock market
 - information security implemented in: the theory on stock market efficiency, Markowitz's portfolio theory and Porter's value chain 469
- System audit
 - penetration testing and system audit - experience gained during the investigation of systems within the UK 595
- System design
 - information security embedded in the design of telematics systems 145
- Telecommunications
 - where have all the hackers gone? Part 4 298
- Telematics systems
 - information security embedded in the design of telematics systems 145
- Telephone
 - where have all the hackers gone? Part 6 307
- Terrorism
 - information warfare and the information systems security professional 14
- Theft
 - what are the information security risks in decision support systems and data warehousing? 197
- Threats
 - penetration testing and system audit - experience gained during the investigation of systems within the UK 595
 - procedures to reduce the computer virus threat 439
 - risk analysis: requirements, conflicts and problems 223
 - the threats on the Web 365
- Type systems
 - secure flow typing 137
- Unix protection
 - building Chinese walls in standard Unix 551
- User authentication
 - modified Chen-Hwang identity-based conference key broadcast schemes with user authentication 339

Subject Index

Verified authentication

improved system-access control using complementary technologies 543

Viruses

a history of computer viruses: three special viruses 430

a history of computer viruses - introduction 412

a history of computer viruses - the famous 'trio' 416

procedures to reduce the computer virus threat 439

the threats on the Web 365

what are the information security risks in decision support systems and data warehousing? 197

Vulnerabilities

risk analysis: requirements, conflicts and problems 223

Word associations

cognitive, associative and conventional passwords: recall and guessing rates 629

World Wide Web

secure flow typing 137

the threats on the Web 365

Year 2000

embedded systems: the other problem 663
